## BOOK SYNOPSIS

The Science of Psychology: An Appreciative View by Laura King (University of Missouri at Columbia) is the first text to bring a truly appreciative view of psychology - as a science and for exploring behavior - to introductory students. It is built around the idea that students must study the discipline of psychology as a whole, that the sub-disciplines are intricately connected, and that human behavior is best understood by exploring its functioning state in addition to its potential dysfunctions.
