BOOK SYNOPSIS

This extraordinary book includes over 40 sets of project plans for all personalities, skill levels and interests that are specifically designed for students, beginning welders, hobbyists, and do-it-yourselfers. Many of the plans have been built multiple times by students and others. The plans are easy to read and the projects are meant to motivate the reader to want to learn the welding and fabrication processes. All plans include a list of materials, dimensions, special notes as needed, and any commentaries about special equipment that might be necessary to complete the project. The cost of building each project varies but generally can be made for under \$5. Many local welding shops and companies that build with sheet metal have scraps laying around that they are willing to donate to schools for student use. In this case, the projects can be made at very little cost to a school or individual.
